Art Unit: 2652

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10 and 15-23, drawn to a "suspension", classified in class 360, subclass 244.3.
  - II. Claims 11-14, drawn to a "method of damping a suspension", classified in class 29, subclass 603.03.
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions of groups II and I are related as process of making and product made, respectively. The inventions are distinct if either or both of the following can be shown:  
(1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other and materially different product, such as, a suspension not including a "proximal mounting section", for instance.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to David. D. Brush on 14 March 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2652

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
